

MythriQ – Motivation Analysis (MOA) – Status: July 3rd, 2025

Goal: Users recognize why they learn – what truly motivates them.

Format: 10 questions, answered using a slider (0 = does not apply at all, 10 = applies completely)

The results are visualized as a bar chart or spider web – with individual recommendations for the appropriate learning method based on the dominant motive.

What motivates you to learn?

1. **I learn because I want to understand new things and grasp connections.**
(Motive: Insight/Knowledge)
2. **I am motivated when I can use my creativity and develop my own ideas.** (Motivation: Design/
Creativity)
3. **I am learning because I want to take on more influence or responsibility later.**
(Motive: Influence/Effectiveness)
4. **It is important to me that my work or learning is meaningful to others.**
(Motive: Meaning/Contribution)
5. **I particularly enjoy learning through exchange with others and through joint projects.**
(Motive: Relationship/Connection)
6. **I need structure and clarity to feel safe and ready to learn.**
(Motive: Order/Security)
7. **I want to continuously improve and systematically expand my skills.**
(Motive: Performance/Competence Development)
8. **I like to make my own decisions and shape my own learning path.**
(Motive: Autonomy/Self-determination)
9. **I am motivated when I receive recognition or appreciation for my performance.**
(Motivation: Status/Approval)
10. **I prefer to learn by trying things out, making mistakes, and discovering things for myself.**
(Motive: Experimentation/Freedom of action)

Accompanying text for the learner:

Your personal motivation profile

You've just discovered what truly motivates you to learn. Unlike a learning style analysis, which shows you **how** you learn best, this motivation analysis focuses on your inner "why"—the emotional and personal reasons **why** you engage with new material. Why you learn.

Everyone learns differently – not only in terms of method, but also in terms of motivation. In your case, the following are particularly pronounced:

(39.) Experimentation &

Meaning You enjoy trying new things – but they must be meaningful to you or others. The app suggests practical learning projects with social or personal added value, including reflection modules. [\(This text snippet will be customized depending on the result. Examples of the 45 possible combinations follow below.\)](#)

Based on your profile, you will now receive suggestions for suitable learning formats, content, and methods that are a perfect fit for you. This makes learning not only more enjoyable but also more effective in the long run.

45 different possible combinations

This test yields 45 different combinations of the "best 2" with the following conclusions for the learner (which can then be output at the end depending on the result):

Cognitive and knowledge-oriented combinations

Focus on knowledge, meaning, understanding, intellectual development

1. Knowledge & Creativity

You don't just want to understand – you want to reshape what you've learned. Learning content that leaves room for your own ideas is particularly motivating for you. The app provides you with creative tasks, open-ended questions, and visualization tools.

2. Knowledge &

Meaning You want to understand what lies behind things – and want to learn something that is meaningful for yourself or others. The app gives you access to in-depth content, real-world application examples, and meaningful projects.

3. Knowledge &

Performance You are driven by the desire to use knowledge strategically for further development. You want to become more competent and measurably improve your skills. The app suggests modular learning paths with clear progress goals and quiz formats.

4. Knowledge & Experimentation:

You think and discover simultaneously – you want to understand new things and try them out immediately. The app recommends interactive content, simulations, and practical tasks that allow you to test them independently.

5. Knowledge & Autonomy

You learn best when you can decide for yourself what and how you learn. The app offers you individual learning paths, flexible choices, and in-depth self-study modules.

6. Knowledge & Influence

For you, knowledge means not only understanding, but also shaping. You want to have a say, contribute to shaping the future, and make well-informed decisions. The app suggests strategic content, case studies, and reflection questions with a leadership focus.

7. Knowledge & Security:

You need clarity and order to engage with learning content. You enjoy learning through structured content with comprehensible logic. The app provides you with systematically structured modules, step-by-step instructions, and clear milestones.

8. Creativity & Meaning

You don't just want to make things beautiful or different – you want them to have an impact. You learn particularly well through projects with social relevance, storytelling, or creating content for others. The app shows you creative challenges with a real purpose.

9. Creativity & Experimentation: You

thrive when you're allowed to try new things. Creative tasks and playful learning get you into a flow state. In the app, you'll find creative tasks, sandbox modules, and open-ended activities.

10. Creativity & Performance

You don't just want to express yourself creatively – you want to grow and improve. The app suggests projects with feedback on results, individual creative challenges, and performance goals with flexibility for implementation.

11. Creativity & Autonomy

You need freedom to think and create. Predetermined patterns tend to inhibit you.

The app offers you open-ended tasks, your own selection options, and tools to visualize or design content yourself.

Socio-emotional combinations

Focus on relationships, communication, sense of community

12. Meaning &

Relationships You want to learn in order to connect with others and create something valuable together. The app recommends collaborative learning formats, team projects, peer feedback, and spaces for exchange.

13. Purpose & Impact

You learn with the goal of making a difference – for yourself and others. The app suggests learning modules with social relevance, leadership questions, impact analyses, and reflections on responsibility.

14. Purpose & Status

You want to do good – and receive recognition for it. The app gives you tasks where you can make your contributions visible, badge systems, and opportunities to present your results.

15. Relationships & Influence:

You are most motivated when you lead, moderate, or organize together with others. The app offers role-based learning, co-leadership simulations, and team communication tools.

16. Relationships & Status

You want to be visible and valued – especially in social interactions. The app supports you with learning formats where you can share posts, receive praise, and actively participate in the community.

17. Relationship & Meaning (similar in content to 1, but with an emphasis on emotional benefits)

You learn because you feel connected to other people and you're searching for your place in the whole. The app offers you inspiring stories, shared learning journeys, and feedback spaces with emotional depth.

18. Relationships & Autonomy

You need closeness and exchange, but also space for your own decisions. The app suggests hybrid learning formats – such as group projects with individual topic selection or peer coaching with flexible design.

Safety- and structure-oriented combinations

Focus on reliability, stability, orientation

19. Safety & Performance You

learn best in a stable, clearly structured environment – but with ambitious goals. The app offers you reliable learning paths, comprehensible milestones, and clear success criteria for self-monitoring.

20. Safety & Relationships You

need trust and a supportive environment to engage in learning.

The app suggests protected group rooms, confidential exchange formats, and guided learning support.

21. Safety & Status You

want to feel safe, but also show what you can do – without the risk of being exposed. The app offers you closed practice areas, anonymous feedback formats, and visible development paths.

22. Safety & Meaning

You want to commit to something meaningful – but only when you have clear guidance. The app provides you with structured content with social relevance, step-by-step modules, and clear contextual information.

23. Security & Influence You

want to shape things, but with a plan. You gladly take on responsibility – as long as you know what you can rely on. The app recommends planning tasks, leadership roles with clear guidelines, and decision-making simulations with feedback.

24. Safety & Autonomy

You need both: personal responsibility and structure. The app offers you a secure, stable learning system with free choice of content or order – a “structured freedom” with a plan B.

Design- and freedom-oriented combinations

Focus on self-determination, creativity, scope for action

25. Autonomy & Creativity You

want to decide for yourself what you learn – and how you express it. In the app you will find open-ended tasks, design options, creative projects and modules with a high degree of individualization.

26. Autonomy & Experimentation You learn

best when you are given freedom and allowed to discover for yourself what works. The app recommends exploratory learning scenarios, prototyping tasks, sandbox exercises, and playful challenges.

27. Autonomy & Influence You

don't just want to think your own ideas, but also put them into practice. The app offers you strategic decision-making exercises, self-directed project assignments, and opportunities to participate in community discussions or votes.

28. Autonomy & Performance

You want to improve – but at your own pace and with your own standards. The app suggests modular learning paths with customizable goals, self-tests, and reflective feedback.

29. Autonomy & Meaning

You want to be free to decide how you invest your energy – it has to be worthwhile and feel meaningful to you. The app offers you freedom of choice regarding topics, values-based learning projects, and opportunities to put your “why” at the center.

30. Autonomy & Status You

want to stand out – but through your own efforts, not through external pressure. The app provides you with tools to make your learning progress visible, create presentations, and strategically publish your results.

Performance- and success-oriented combinations

Focus on goal orientation, effectiveness, competition

31. Performance & Impact

You don't just want to grow, you also want to make a difference with your skills. The app suggests practical decision-making tasks, leadership exercises, and role simulations with responsibility components.

32. Performance & Status

You want to make your achievements visible – and be recognized for them. The app offers you clear goal modules, ranking elements, achievement badges, or publicly viewable progress profiles (if desired).

33. Performance & Experimentation

You enjoy testing yourself against challenges – and trying out new ways to achieve your goals. The app suggests exploratory challenges with scoring, playful formats with high-score logic, or competitive formats in groups.

34. Performance &

Relationships You want to improve together – through exchange, feedback, and team performance. The app promotes collaborative performance formats, peer review, and community-based goal setting.

35. Performance & Creativity

You want to impress with original ideas – and be successful as a result. The app recommends creative problem-solving formats with evaluation logic, innovation challenges, and open-ended tasks with feedback on results.

Action-oriented and experimental combinations

Focus on practice, doing, trying things out

36. Experimentation & Creativity

You don't just think creatively – you want to put it into practice immediately. The app offers you open-ended design tasks, sandbox learning environments, playful tools, and project formats where you can create something new without fixed guidelines.

37. Experimenting & Influence

You want to try things out to become effective – learning is a testing ground for responsibility for you. The app suggests realistic decision-making scenarios, simulation exercises, and interactive business games with role-based responsibility.

38. Experimentation & Relationships

You learn best through collaborative action – by doing things with others. The app offers group tasks with shared outcomes, co-creation processes, and practical interaction in virtual teams.

39. Experimentation & Meaning

You enjoy trying new things – but they have to be meaningful to you or others. The app suggests practical learning projects with social or personal added value, including reflection modules.

40. Experimentation & Status: You

want to demonstrate your real-world capabilities. The app provides challenges with publicly visible results, achievement systems, and competitions where your solutions are evaluated.

41. Experimentation & Safety You're

ready to take action – but only if you have a clear framework. The app offers you step-by-step experiments, checklists for practical action, and structured tasks with concrete feedback.

42. Experimentation & Autonomy You

want to do what interests you – in your own way. The app suggests open-ended exercise formats, freedom of tool selection, and practical self-directed projects where you decide what and how you learn.

43. Experimentation & Performance

You want to prove yourself through action. The app offers you task-based tests, performance-oriented projects, and practical exercises with measurable goals.

44. Experimenting & Learning: You

understand best by doing – you want to grasp things by trying them out. The app combines theoretical input with immediately applicable practical formats, simulations, and trial-and-error modules.

Status- and power-related combinations

Focus on influence, external impact, recognition

45. Influence & Status

You learn to be visibly effective – you want to have a say, lead, and receive recognition. The app suggests modules with leadership tasks, role simulations, strategic communication, and publicly visible learning contributions. Your results can be displayed in rankings, presentations, or leaderboards.
